

CIR/45/2025-2026

Date: 11st March, 2026

Dear Parents,

We are pleased to introduce **Yardstick – BeeCurious Experiential Learning Program**, an initiative designed to nurture your child’s natural creativity and curiosity while promoting hands-on, activity-based learning in Science and Mathematics. This program encourages students to explore concepts through practical experiences, helping them develop deeper understanding, critical thinking, and problem-solving skills.

As part of this initiative, students will receive specially designed **hands-on learning kits and activity workbooks** that will support their learning throughout the program.

Parents are requested to collect these **BeeCurious hands-on kits and activity workbooks** from the mentioned venue between **1st April and 5th April 2026** for students of **Grades I to VIII**.

Kindly visit the designated pickup location on the scheduled dates and carry the student’s ID card or Parent ID card for verification at the time of collection. **Please ensure that the kits are collected as per the given schedule, as they will not be distributed from the school at a later date.** We request you to coordinate with the Yardstick team accordingly and make the necessary arrangements to collect the kits.

Please find the distribution schedule below.
